

Nevada B-3rd Grade (B-3) Buckets

Situation Statement: Aligned early learning and education experiences based in the science of learning and child development are essential for children's success. Nevada's statewide data make clear that equitable access to these experiences is not universal. Children's experiences, birth through 3rd grade, are not aligned and effective transitions between programs and systems are not supported, especially for children from minoritized communities. Our P-3 plan is intentionally aligned to the Nevada Statewide Plan for the Improvement of Pupils and is designed to build and align equitable high quality early learning systems to provide the foundation for all children's school success.
