Introduction

School climate is a multi-faceted concept that describes the extent to which a school community creates and maintains a safe school campus, a supportive academic, disciplinary, and physical environment, and respectful, trusting, and caring relationships throughout the school community.¹ Research shows that creating a positive school climate can help districts, schools, and teachers meet key goals, including boosting student achievement and closing achievement gaps;² increasing high school graduation rates;³ decreasing teacher turnover and increasing teacher satisfaction;⁴ and turning around low-performing schools.⁵ Positive school climates also enhance safety in the school and community by increasing communication among students, families, and faculty,⁶ and reducing violence and bullying.⁷

The U.S. Department of Education (ED) and other federal agencies, including the U.S. departments of Justice and Health and Human Services, have invested in developing and maintaining a breadth of resources and services for improving school climate and discipline to help ensure safe and supportive learning environments. The information and tools in this directory can be used to develop supportive classrooms and schools that prevent misbehavior, and support the diversity of student needs, including social and emotional skills development and mental health services.

To help educators, district officials, and other education stakeholders to better access these resources from across the federal government, ED has developed this directory of pre-k–12 school climate and discipline resources, including those developed by technical assistance centers funded by federal agencies. Specifically, the directory includes titles, electronic links, descriptions, and other relevant information for a range of resources related to research and monitoring, training products and tools, technical assistance centers, federal policy and guidance, and federal initiatives related to school discipline and school climate.

How to Use This Directory

As a positive school climate is the result of many interrelated components – including student mental health and the presence of school-based supports, rates of misbehavior and violence, and peer and student-adult relationships – there are many approaches a school may utilize to accomplish the goal of creating safe, supportive environments where all students can engage in learning. No single program or practice, implemented on its own, will enable schools to accomplish the goal of creating a positive climate.

For this reason, this directory is designed to be used in conjunction with ED’s **Guiding Principles: A Resource Guide for Improving School Climate and Discipline** (summarized below), an organized set of action steps to help educators and school officials begin a local effort to improve school climate and school discipline practice. For each resource included in the directory, we have indicated the principles and action steps for which the resource is likely to be useful. To locate a list of resources corresponding to each principle, please see the index at the back of this directory.

For each resource, we also indicate the predominant components of school climate it covers and, as relevant, whether the resource may be particularly useful for school climate measurement or the implementation of new practices and approaches related to school climate and school discipline.

Those components are based on the Safe and Supportive Schools Model developed by ED, and include engagement, safety, and environment.⁸ Engagement refers to the relationships between students, teachers, families, and schools, and the connections between schools and the broader community.⁹ Safety refers to the prevalence of incidents taking place in a school, or during school-related activities, involving violence, bullying, harassment, and substance use.¹⁰ Environment refers to the appropriateness of campus facilities, the availability of school-based mental and physical health supports, and the implementation of school disciplinary policies.¹¹

Guiding Principles: A Resource Guide for Improving School Climate and Discipline

To help states, districts, and schools to develop the positive school climates, and effective discipline policies and practices that produce strong conditions for learning and academic excellence, ED has identified and described in this resource guide three key principles of reform and related action steps. The guiding principles center around: climate and prevention; clear, appropriate, and consistent expectations and consequences; and fairness, equity, and continuous improvement.

Guiding Principle 1: Climate and Prevention

Schools that foster positive school climates can help to engage all students in learning by preventing student misbehavior and intervening effectively to support struggling and at-risk students.

Action Steps for Guiding Principle 1

- (1) Engage in deliberate efforts to create positive school climates.
- (2) Prioritize the use of evidence-based prevention strategies, such as tiered supports, to promote positive student behavior.
- (3) Promote social and emotional learning to complement academic skills and encourage positive behavior.
- (4) Provide regular training and supports to all school personnel – including teachers, principals, support staff, and school-based law enforcement officers – on how to engage students and support positive behavior.
- (5) Collaborate with local mental health, child welfare, law enforcement, and juvenile justice agencies and other stakeholders to align resources, prevention strategies, and intervention services.
- (6) Ensure that any school-based law enforcement officers' roles focus on improving school safety and reducing inappropriate referrals to law enforcement.

- Assigning Police Officers to Schools (Page 10)

Guiding Principle 2: Clear, Appropriate, and Consistent Expectations and Consequences

Schools that have discipline policies or codes of conduct with clear, appropriate, and consistently applied expectations and consequences will help students improve behavior, increase engagement, and boost achievement.

Action Steps for Guiding Principle 2

- (1) Set high expectations for behavior and adopt an instructional approach to school discipline.
- (2) Involve families, students, and school personnel in the development and implementation of discipline policies or codes of conduct, and communicate those policies regularly and clearly.
- (3) Ensure that clear, developmentally appropriate, and proportional consequences apply for misbehavior.
- (4) Create policies that include appropriate procedures for students with disabilities and due process for all students.
- (5) Remove students from the classroom only as a last resort, ensure that any alternative settings provide students with academic instruction, and return students to their regular class as soon as possible.

	• Positive School Discipline Course for School Leaders (Page 8)

Guiding Principle 3: Equity and Continuous Improvement

Schools that build staff capacity and proactively and continuously evaluate the school’s discipline policies and practices are more likely to ensure fairness and equity, and promote achievement for all students.

Action Steps for Guiding Principle 3

- (1) Train all school staff to apply school discipline policies, practices, and procedures in a fair and equitable manner that does not disproportionately impact students of color, students with disabilities, or other students at risk for dropout, trauma, or social exclusion.
- (2) Use proactive, data-driven, and continuous efforts, including gathering feedback from families, students, teachers, and school personnel in order to prevent, identify, reduce, and eliminate discriminatory discipline and unintended consequences.

Products and Tools on School Climate and Discipline

Federal agencies have funded the development of a variety of products and tools that provide information and guidance on school climate and discipline, and how to improve it, including training materials, guides, briefs, and presentations. The items in this section are intended to provide background information on issues relevant to school climate and discipline, help school officials to administer training to increase personnel skills and knowledge, and inform readers about strong practices and lessons learned from exemplary programs. This section is particularly relevant for education stakeholders trying to locate materials that would help them in their efforts to launch new initiatives for improving school climate and discipline practices.

Training

Community Action Toolkit: Bullying Prevention Training Module

Link	http://www.stopbullying.gov/prevention/in-the-community/community-action-planning/community-action-toolkit.pdf
Description	This research-based training module can help one lead a bullying prevention effort in his/her local community. The module addresses initiating, planning, and implementing a community-wide event via PowerPoint presentations, speaker notes, a tool kit, and a supplemental guide that includes a landscape assessment, template community event agenda, a community engagement tip sheet, and many other useful tools.
Topics	Safety (Bullying), Environment
Focus Pop	Youth (Birth to Age 21)
Audience	School/District Administrators, School Support Staff, Researchers

Data, Measurement, and Reporting

As part of any effort to improve school climate and discipline practice, it is imperative that schools have access to data that can continuously inform the implementation of new approaches, diagnose emerging issues, and inform the surrounding community of the progress of these efforts. Federal agencies provide a range of products to help educators collect and analyze data relevant to school climate and discipline practices through various approaches, including school climate surveys, fidelity assessments, and evaluations of educator practice. This section highlights the most significant products that may assist educators in these areas. In addition, federal agencies fund a number of technical assistance centers to compile the latest research and provide assistance on measurement. Those resources can be found in the [Technical Assistance Center](#) section later in the document. Further, under [Federal Surveys, Research and Analysis](#), there are federally funded studies, including federal surveys with items and scales that measure domains relevant to school climate and discipline.

Policy Guidance and Resources

To encourage the creation of safe supportive learning environments and compliance with applicable laws, federal agencies have compiled relevant state statutes, developed guidance to clarify federal law, and issued policy statements. The federal agencies have also developed specific policies and guidance to address specific emerging issues, including bullying and discipline, and their implications for schools' civil rights liability. The following are the primary policies and guidance the federal and state governments have developed related to school climate and discipline.

Settlement Agreement Between U.S. Department of Education's Office for Civil Rights and Oakland (Calif.) Unified School District

Link	http://www2.ed.gov/about/offices/list/ocr/docs/investigations/09125001.html
Description	<p>This agreement addressed the civil rights investigation into whether African American students were disciplined more frequently and harshly than white students in the Oakland (Calif.) Unified School District. The agreement includes ways that the district will</p> <ul style="list-style-type: none"> • Ensure that misbehavior is addressed in a manner that does not require removal from school, and collaborate with experts in research-based strategies that develop positive school climates by preventing discrimination in the implementation of school discipline. • Identify at-risk students and provide them with support services in order to decrease behavioral difficulties, and continue to provide academic services for students who are removed from school for disciplinary reasons. It also requires the district to review and revise its disciplinary policies, train staff and administrators on its discipline policies, and develop and implement programs for students, parents, and guardians that will explain the district's discipline policies and behavioral expectations, and that will inform parents and guardians of their right to raise concerns and file complaints concerning discipline. • Conduct an annual survey of students, staff, community members, and parents regarding discipline. • Improve its discipline data collection system in order to evaluate discipline policies and practices, with the goal of replicating "best practices" throughout the District.

Federal Surveys, Research, and Analysis

Good practice begins with an understanding of local, state, and national contexts, of what is effective and what is not. Federal agencies fund a range of projects through which school climate and discipline practices are measured and analyzed. Below is a list of federally funded studies, information on clearinghouses of evidence-based practices, and federal surveys with items and scales that measure school climate and discipline.

Federal Surveys With School Climate Items and Scales

The federal government administers several surveys that measure aspects of school climate and/or discipline as contextual variables. The items and scales in each are examples of what schools and districts could potentially use in developing or revising their school climate surveys.

Below is information on each federal survey that included school climate items or scales.

Beginning Postsecondary Students (BPS) Longitudinal Study

Constructs	Student-faculty relationships; Social integration
Respondents	Data were collected from a sample of students entering postsecondary education for the first time. In the most recent wave, students were initially surveyed at the end of their first academic year (2003–04) and then received invitations to participate in follow-up surveys at the end of their third (2005–06) and sixth (2008–09) years after entry into postsecondary education.
Reports	<ul style="list-style-type: none"> BPS publications and technical reports published by the National Center for Education Statistics are available at http://nces.ed.gov/pubsearch/getpubcats.asp?sid=014 The BPS-B bibliography includes selected research reports by outside researchers and is available at http://nces.ed.gov/bibliography/ Selected publications include: Mercado, M. Description	This report provides results from the evaluation of seven social and character development (SACD) programs. The report includes three key findings: (1) The seven SACD programs increased the reported implementation of classroom activities intended to increase students' social and character development; (2) The control schools also reported the use of a variety of activities intended to increase students' social and character development as "standard practice" but not at the same levels as the treatment schools; and (3) There were no differences in students' social and emotional competence, behaviors, academic performance, or perceptions of school climate between students in schools implementing one of the seven SACD programs and those in the control schools.

The Final Report and Findings of the Safe School Initiative: Implications for the Prevention of School Attacks in the United States

Link	http://www.edpubs.gov/document/ed001357p.pdf?ck=929
Description	This report details how the U.S. Secret Service and the U.S. Department of Education studied school-based attacks and what was found. The extensive examination covers 37 incidents of targeted school shootings and school attacks that occurred in the United States beginning with the earliest identified incident in 1974 through May 2000. The focus of the Safe School Initiative was to examine the thinking, planning, and other behaviors engaged in by students who carried out school attacks. Particular attention was given to identifying pre-attack behaviors and communications that might be detectable--or "knowable"--and could help in preventing some future attacks.

Parent Involvement and Extended Learning Activities in School Improvement Plans in the Midwest

Link	http://ies.ed.gov/ncee/edlabs/projects/project.asp?ProjectID=282
Description	This study reports the findings of a content analysis of 1,400 school improvement plans describing proposed activities for boosting student achievement in five Midwest Region states. Sections 1116 and 1118 of the <i>No Child Left Behind Act</i> (NCLB) outline requirements and recommendations for involving parents and providing extended learning activities (before-school, after-school, or summer programs), two sets of activities that some research suggests improve student outcomes.

What Characteristics of Bullying, Bullying Victims, and Schools Are Associated with Increased Reporting of Bullying to School Officials?

Link	http://ies.ed.gov/ncee/edlabs/regions/northeast/pdf/REL_2010092.pdf
Description	This report describes a study that tested 51 characteristics of bullying victimization, bullying victims, and bullying victims’ schools to determine which were associated with reporting to school officials. It found that 11 characteristics in two categories—bullying victimization and bullying victims—showed a statistically significant association with reporting. The study also notes the high percentage (64 percent) of respondents who experienced bullying but did not report it.

Federal Interagency Initiatives

While the focus of each federal agency is unique, the topics and populations whom they serve sometimes overlap. This is particularly true for issues related to school climate and discipline. Between challenging economic times and the need to ensure supports are developed and provided efficiently and effectively, child-serving, federal agencies are working together as part of several interagency initiatives.

The Federal Interagency Reentry Council

Link	http://csgjusticecenter.org/nrrc/projects/firc
Description	The Federal Interagency Reentry Council represents 20 federal agencies, working towards a mission: to make communities safer by reducing recidivism and victimization; to assist those who return from prison and jail in becoming productive citizens; and to save taxpayer dollars by lowering the direct and collateral costs of incarceration. The Reentry Council, established by Attorney General Holder in January 2011, represents a significant executive branch commitment to coordinating reentry efforts and advancing effective reentry policies. It is premised on the recognition that many federal agencies have a major stake in prisoner reentry. The council addresses numerous topics and populations involved in this broad issue. One topic is youth, and one active subcommittee of the council is on juvenile reentry.
Topics	Engagement (relationships, school participation)
Focus Pop	Youths who have been detained or incarcerated.

Supportive School Discipline Initiative

Link	http://www.ojjdp.gov/enews/11juvjust/110721.html http://www.ed.gov/school-discipline
Description	This initiative was launched in response to a groundbreaking study that demonstrated how suspension and expulsion are not only overused but also inappropriately used to discipline children in school. U.S. Attorney General Eric Holder and U.S. Secretary of Education Arne Duncan launched the collaborative initiative between the departments of Justice and Education to stem the school-to-prison pipeline and advance the use of positive discipline and learning policies and practices in schools nationwide.
