Engagement • Safety • Environment

## SUMMARY TABLE OF OFFICE OF SAFE AND SUPPORTIVE SCHOOLS APPROVED SCHOOL CLIMATE SURVEYS (as of March 24, 2023)

To assist educators and education agencies in locating a valid and reliable needs assessment that suits their needs, the National Center on Safe Supportive Learning Environments maintains a compendium of student, staff, and family surveys that can be used as part of a school climate needs assessment. This document provides a summary table of each survey by respondent type included in the School Climate Survey Compendium as of March 24, 2023.

Please note that the U.S. Department of Education’s Office of Safe and Supportive Schools does not endorse any particular scale or survey presented in this compendium. Additionally, the table presented is not an exhaustive listing of available measures or survey instruments. If you would like to nominate a survey that is not currently included in the compendium, go to <http://safesupportivelearning.ed.gov/school-climate-survey-compendium/nominate-school-climate-survey>.
