

**Welcome to Today's Webinar!**

**Violence Prevention:  
School-Based Approaches to  
Conduct Problems**

**This event will start at 11:00 am EDT.**

# Welcome to Today's Webinar

## Audio Information

Dial: 800-857-0373

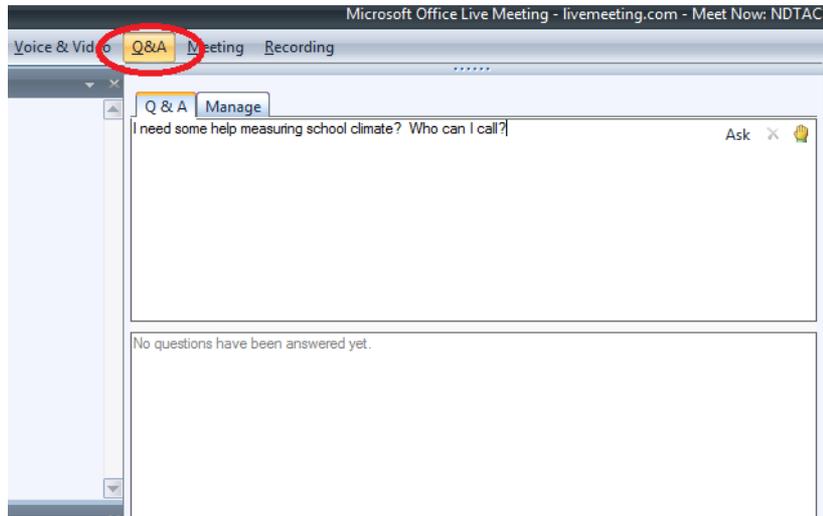

Conference ID: 2514225

**If you have technical difficulties logging into the web-based portion of the event, please contact Live Meeting Customer Support at 1 (866) 493-2825.**

**If you have any questions about the Live Meeting technology or the Webinar, please contact SSSTA at [sssta@air.org](mailto:sssta@air.org).**

## Q&A

If you have a question for the presenters, please type it in the Q & A Pane or email [sssta@air.org](mailto:sssta@air.org) during the Webinar.

## Evaluation

**Safe and Supportive Schools**  
Engagement | Safety | Environment

### Participant Feedback

**Establishing Supportive Relationships between Teachers, Staff, Students and Families**  
Wednesday, February 17, 2011

Please provide us with your feedback on today's Webinar by answering the questions below. The form should only take a few minutes to complete and all responses will be completely anonymous. Your participation is voluntary.

\* 1. My role can best be described as (please check as many as apply):

- |  |  |                                   |
|--|--|-----------------------------------|
| <input type="checkbox"/> Community Member            | <input type="checkbox"/> School/District Administrator | <input type="checkbox"/> Teachers |
| <input type="checkbox"/> Family Member               | <input type="checkbox"/> State Administrator           |                                   |
| <input type="checkbox"/> School Support Staff Member | <input type="checkbox"/> Student                       |                                   |

An event evaluation will appear as the last slide in the presentation. Please input your answers *directly* into the slide. All answers are *completely anonymous* and are not visible to other participants.

For assistance during the Webinar, please contact the Safe and Supportive Schools Technical Assistance Center at [sssta@air.org](mailto:sssta@air.org).

**Safe and Supportive Schools**  
Engagement | Safety | Environment

# The Safe and Supportive Schools Technical Assistance Center

- Funded by the U.S. Department of Education's Office of Safe and Drug-Free Schools.
- Provides training and support to states, including 11 grantees funded under the Safe and Supportive Schools Program and other state administrators; administrators of districts and schools; teachers; support staff at schools; communities and families; and students.
- Goal is to improve schools' conditions for learning through measurement and program implementation, so that all students have the opportunity to realize academic success in safe and supportive environments.

\*The content of this presentation was prepared under a contract from the U.S. Department of Education, Office of Safe and Drug-Free Schools to the American Institutes for Research (AIR). This presentation does not necessarily represent the policy or views of the U.S. Department of Education, nor do they imply endorsement by the U.S. Department of Education.

#### A Moment of Instant Gratification April 07, 2011

Instant gratification is not usually a big part of my day as a federal bureaucrat. But on March 10, 2011, I got to experience it. March 10 was the White House Conference on Bullying Prevention. It was an amazing day. I sat in the Blue Room of

# School-Based Prevention of Conduct Problems

Denise C. Gottfredson, Ph.D., University of Maryland

Safe and Supportive Schools  
Engagement | Safety | Environment

## Which of the following best describes your current role?

- State Education Personnel
- District or School Administrator
- Teacher or School Support Staff
- Community or Family Representative
- Student
- Researcher
- Other

**Which of the following best describes the primary reason you chose to participate in today's session?**

- You are responsible for providing leadership on the topic of violence prevention (whether at a state, district or building level) and are looking for information to inform your practice.
- You are gathering practical information and strategies on violence prevention in order to teach it to, or share it with, colleagues.
- You are gathering information to inform your own professional practice.
- More than one of the above.

# What we will Cover Today

**1** Nature and Extent of Juvenile Delinquency

**2** In-School vs. Out-of-School Crime

**3** Risk Factors for Problem Behaviors

**4** Effective Practices for Reducing Conduct Problems

**5** The Importance of High Quality Implementation

# Polling Question #3

Which age group engages in the most criminal activity, according to arrest records?

- 10-14
- 15-19
- 20-24
- 25 and older

# Self-Reported Problem Behaviors, Past 12 Months, High School Seniors, 2008

During the last 12 months, have you:	Total (N=2,254)
Gotten into a serious fight in school or at work?	12.4%
Taken part in a fight where a bunch of your friends were against another group?	16.8%
Hurt someone badly enough to need bandages or a doctor?	12.4%
Used a knife or gun or some other thing (like a club) to get something from a person?	3.2%
Taken something not belonging to you over \$50?	9.5%
Taken part of a car without permission of the owner?	3.5%
Gone into some house or building when you weren't supposed to be there?	25.8%
Damaged school property on purpose?	11.5%
Used alcohol at least once?	69.6%
Used marijuana at least once?	32.9%

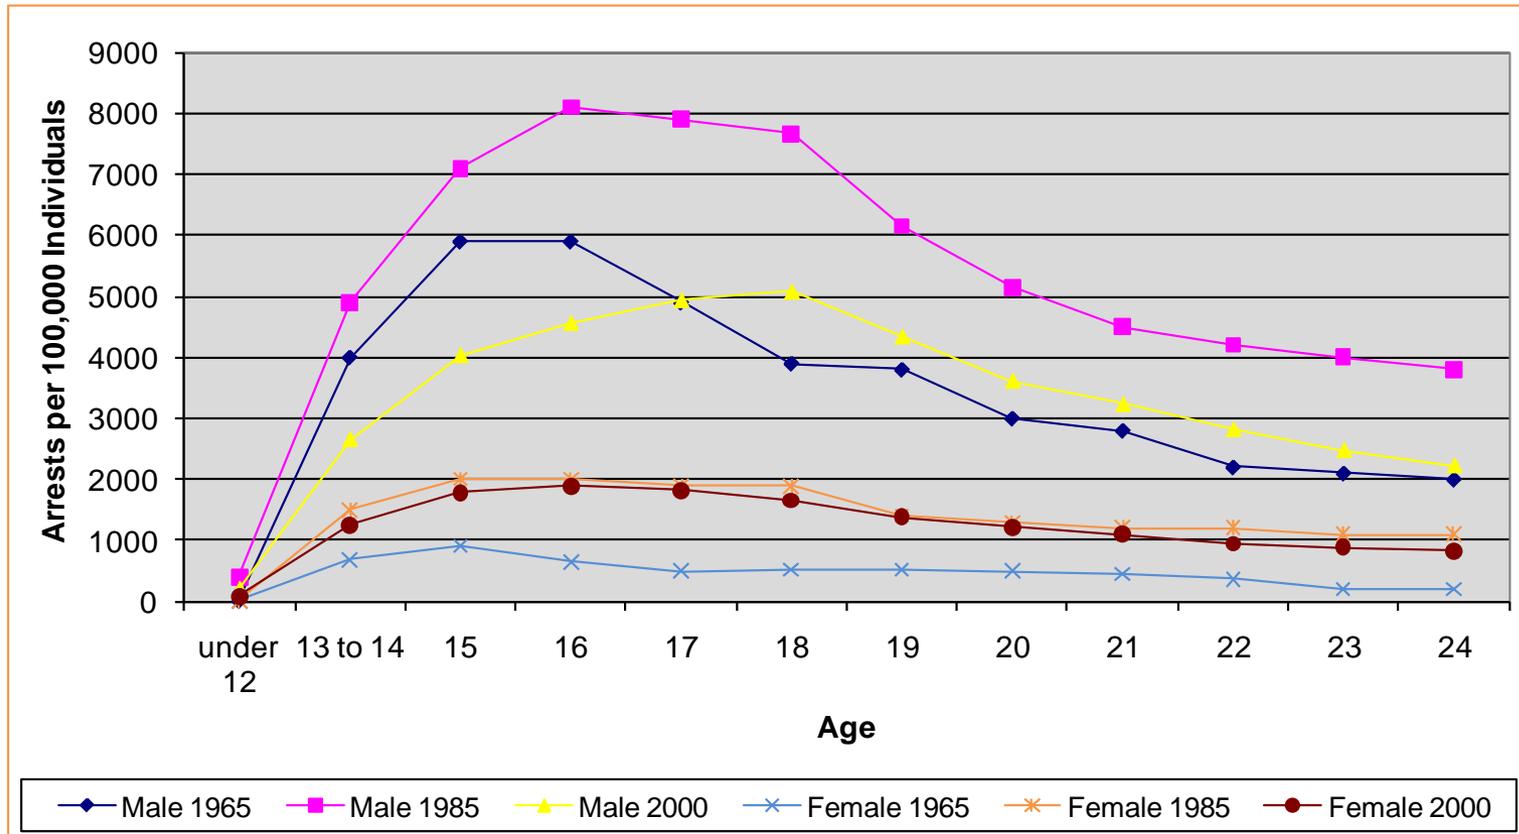

# Gender Differences in Problem Behaviors, High School Seniors, Self-Reports, 2008

During the last 12 months, have you:	Male (Percent)	Female (Percent)
Gotten into a serious fight in school or at work?	14.9	9.6
Taken part in a fight where a bunch of your friends were against another group?	20.7	11.9
Hurt someone badly enough to need bandages or a doctor?	17.9	6.5
Used a knife or gun or some other thing (like a club) to get something from a person?	4.4	1.4
Taken something not belonging to you over \$50?	12.4	6.4
Taken part of a car without permission of the owner?	5.1	1.5
Gone into some house or building when you weren't supposed to be there?	30.3	21.1
Damaged school property on purpose?	16.3	6.8
Used alcohol at least once?	<b>68.1</b>	<b>69.5</b>
Used marijuana at least once?	<b>33.7</b>	<b>30.2</b>

# Age Specific Arrest Rates by Gender: 1965, 1985, 2000

Source: Uniform Crime Reports

# Conclusions about Nature and Extent of Juvenile Delinquency

- Problem behavior is prevalent among juveniles.
- Arrest data and self-report data converge: males have higher rates of delinquency than females.
- “Gender gap” is greatest for most serious crimes.
- Arrests increase during early adolescence to peak in mid-adolescence, then they decline.

# Different Types of Offenders?

- **Do juveniles differ in their...**
  - Frequency of offending?
  - Seriousness of offending?
  - Duration of offending?
- **Do juveniles specialize in different types of offenses?**

# Chronic vs. “Adolescent-limited”

- Early research discovered that 52% of all crimes known to the police could be traced to 6% of the population.
- Subsequent research has confirmed that 7-25% of all offenders can be described as “high-rate, serious, chronic” offenders.
- The rest are “low-rate, minor, adolescent-limited” offenders.

# Co-Occurrences of Problem Behaviors

<b>If at Risk in This Area</b>	<b>Percent at Risk in This Domain</b>	<b>Sexuality</b>	<b>Depression/Suicide</b>	<b>Antisocial Behavior</b>	<b>School Problems</b>
<b>Alcohol</b>	31	70	33	49	23
<b>Tobacco</b>	20	77	39	53	26
<b>Illicit Drugs</b>	11	84	46	61	32
<b>Sexuality</b>	44	--	34	41	19
<b>Depression/Suicide</b>	25	59	--	38	18
<b>Antisocial Behavior</b>	28	64	34	--	22
<b>School Problems</b>	12	72	40	53	--

# Co-Occurrences of Problem Behaviors, Cont.

<b>If at Risk in This Area</b>	<b>Percent at Risk in This Domain</b>	<b>Alcohol</b>	<b>Tobacco</b>	<b>Illicit Drug Use</b>
<b>Alcohol</b>	31	--	42	27
<b>Tobacco</b>	20	66	--	35
<b>Illicit Drugs</b>	11	72	60	--
<b>Sexuality</b>	44	49	34	22
<b>Depression/ Suicide</b>	25	41	30	21
<b>Antisocial Behavior</b>	28	54	37	24
<b>School Problems</b>	12	62	43	31

# Conclusions about Chronicity and Versatility in Offending

- A small segment of the population can be described as chronic offenders.
- Delinquents are primarily versatile.

## Implications for school-based prevention practices?

- We may need a two-pronged approach for the chronic vs. the “adolescent-limited” groups
- It makes little sense to specialize prevention
- Instead, target the risk factors that predict all kinds of problem behaviors to reduce all of them at once.

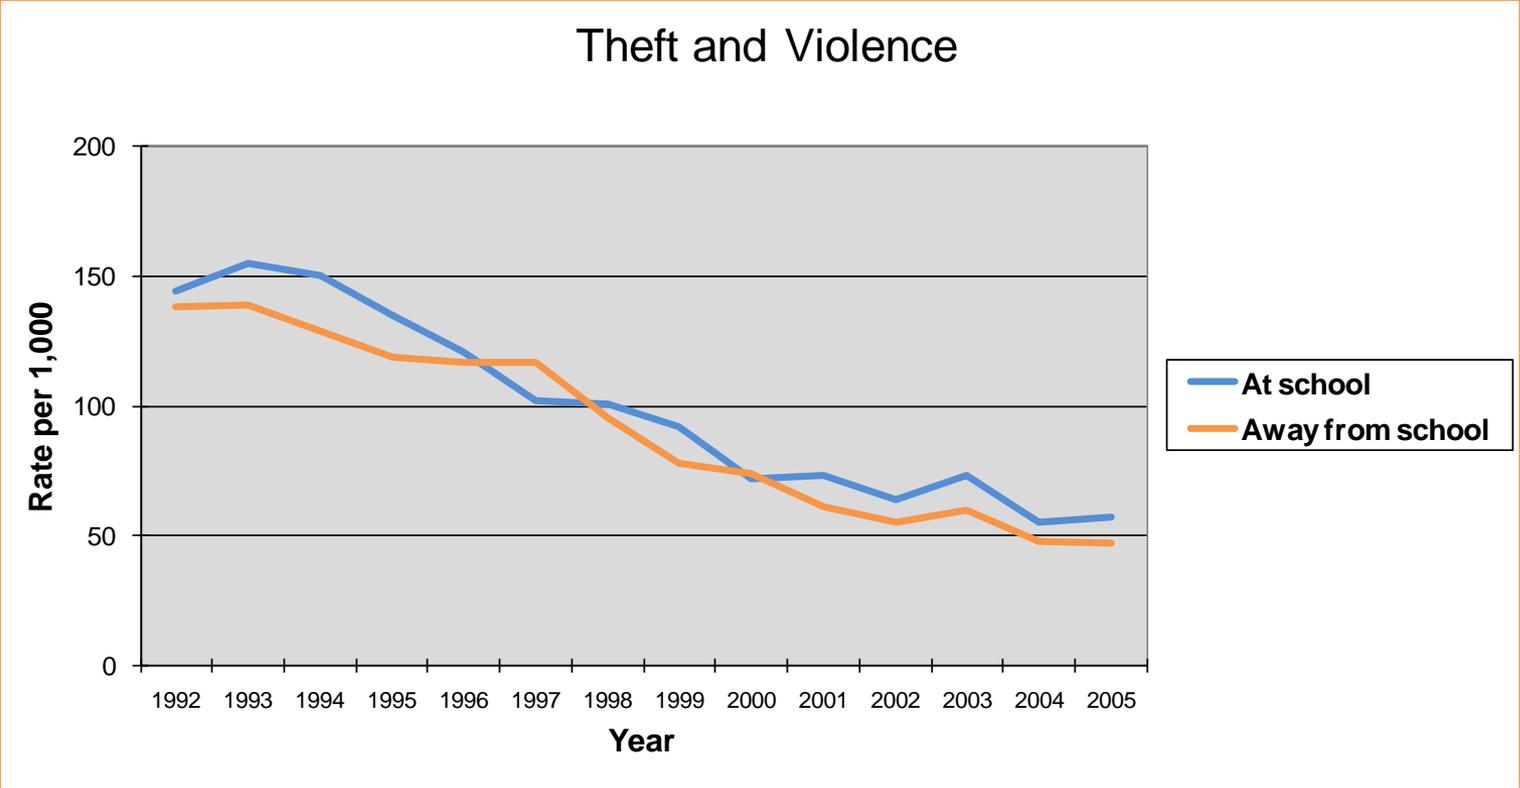

# Polling Question #5

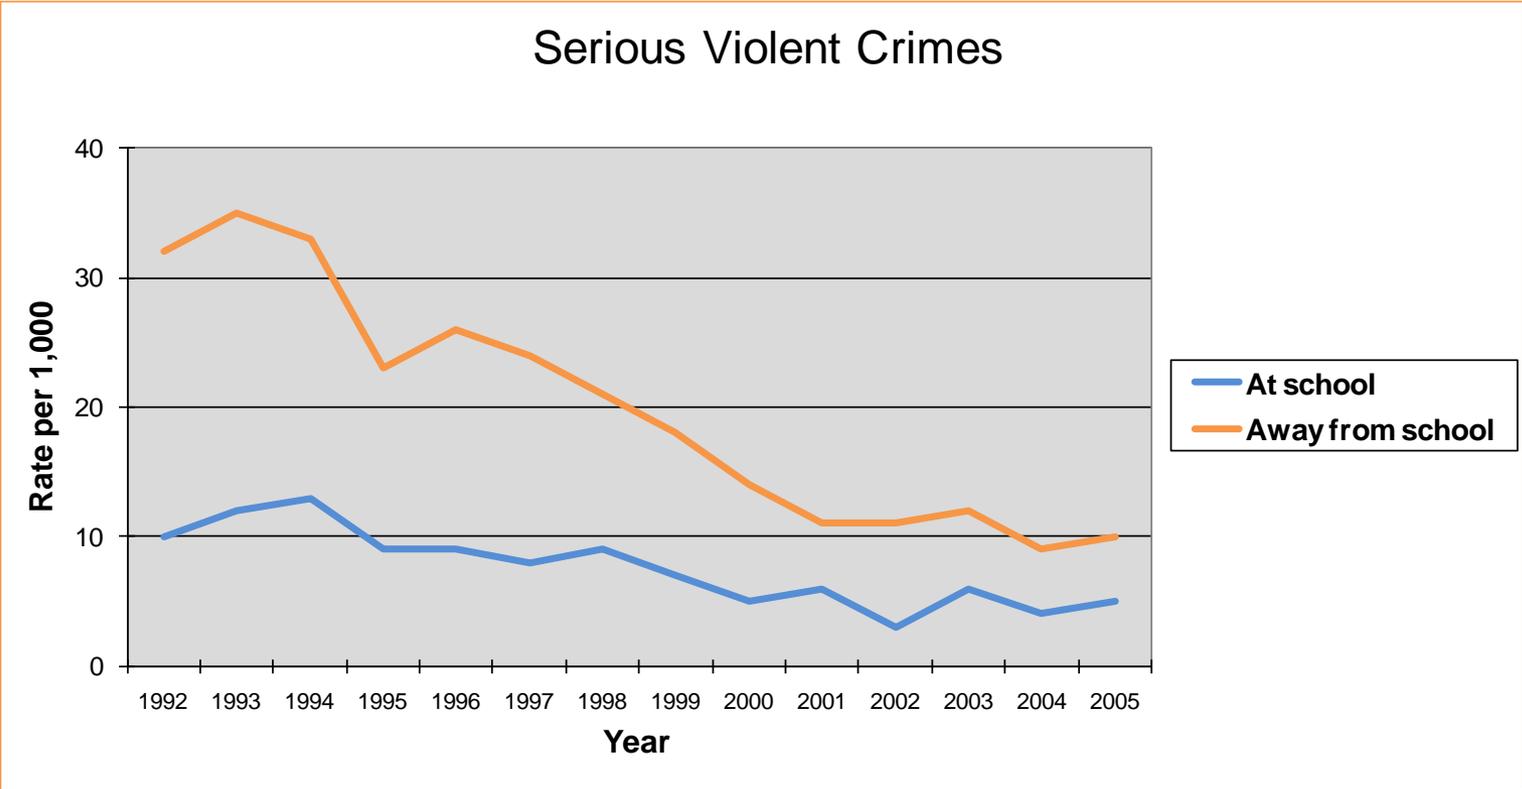

Is the rate of juvenile crime victimization higher in school or out of school?

- In school
- Out of school

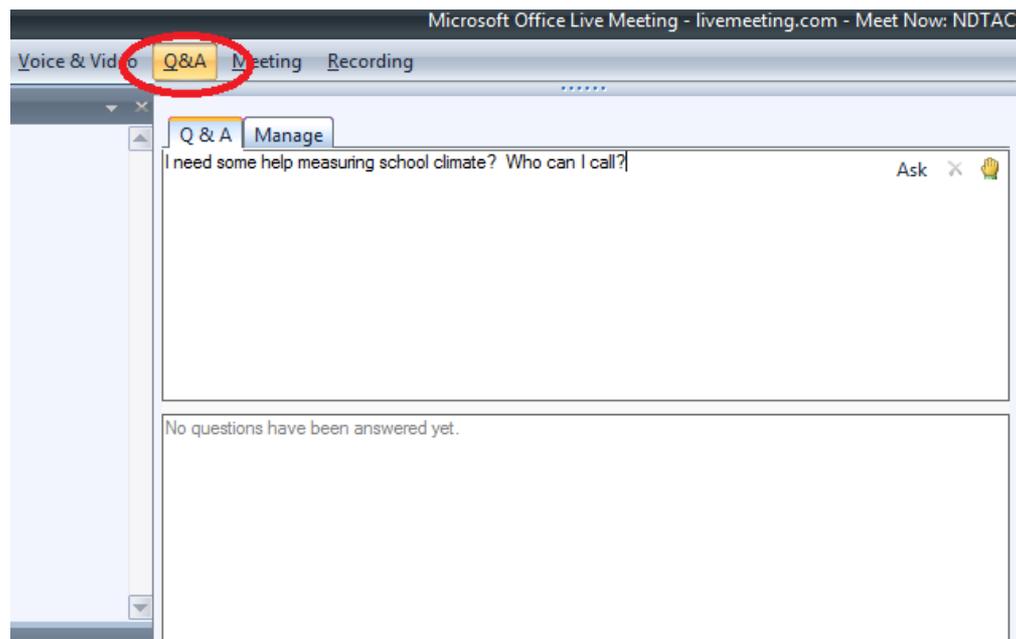

# Serious Violence by Location: Age 12-18: NCVS—Converging Rates

# Questions?

If you have a question for the presenter, please type it in the Q & A Pane or email [sssta@air.org](mailto:sssta@air.org).

Risk factors are variables associated with a high probability of onset, greater severity, and longer duration of problem behavior.

# Risk Factors for Future Offending, By Domain

Individual Factors	Family Factors	School and School-Related Factors	Peer Factors	Community Factors
<p>Neuropsychological deficits: Executive Functioning</p> <p>Low Intelligence</p> <p>Early “Under-controlled” Temperament: (restless, impulsive, poor attention, uninhibited)</p> <p>Low empathy</p> <p>Impulsiveness</p> <p>Social Cognitive Skill Deficits</p>	<p>Family History of Crime</p> <p>Large Family Size</p> <p>Separation from Biological Parents</p> <p>Family Mgmt. Practices:</p> <ul style="list-style-type: none"> <li>• Poor Supervision/ Monitoring</li> <li>• Inconsistent Discipline</li> <li>• Lack of Warmth</li> </ul> <p>Family Conflict</p> <p>Weak emo’l bonds to fam. [Individ. Factor]</p>	<p>Individual School-Related Factors:</p> <ul style="list-style-type: none"> <li>• Academic Failure</li> <li>• Low Attachment to School</li> <li>• Low Commitment to Educational Goals</li> </ul> <p>School Factors:</p> <p>Inconsistent Disciplinary Practices</p> <p>Communal organization (+)</p>	<p>Peer Rejection in Elementary School</p> <p>Association with Delinquent Peers</p>	<p>Urban Location</p> <p>“Concentrated Disadvantage”:</p> <ul style="list-style-type: none"> <li>• Poverty</li> <li>• High % Female-Headed Households</li> <li>• Residential Instability</li> </ul> <p>Low “collective efficacy” – willingness to intervene</p> <p>Community norms for behavior</p>

- Address predictors of the problem
- Intervene early
- Include those at greatest risk
- Address the diversity of the population

# Important Dimensions of School-Based Prevention

- Address school environment risk factors vs. address individual risk factors.
- Targeting
  - *Universal*: Targets general population
  - *Selective*: Targets population at elevated risk for initiating problem
  - *Indicated*: Targets individuals already engaged in the problem behavior
- Effective programs/practices are available for all.

# How Do We Know What Works?

## ■ Historical:

- Personal beliefs
- Word of mouth
- Testimonials
- Marketing

## ■ Contemporary:

- Objective scientific evidence

## ■ University of Colorado Blueprints Model Programs Criteria

- Evidence of Deterrent Effect with a Strong Research Design
  - Effects on delinquency (including childhood aggression and conduct disorder), drug use, or violence.
  - Experimental design with random assignment or quasi-experimental design with matched control groups.
  - Adequate sample size to ensure power.
  - Low attrition, especially differential attrition.
  - Reliable and valid measurement.
- Sustained effect – at least one year beyond treatment
- Multiple site replication (e.g., evidence that effects are replicated in more than one site, preferably in diverse settings.)

# Classification of School-Based Prevention Activities: Individually-Oriented

- **Prevention curriculum, instruction, or training**
- **Cognitive behavioral or behavior modification interventions**
- **Counseling/social work/therapeutic interventions**
- **Individual attention/mentoring/tutoring/ coaching**
- **Recreational, enrichment and leisure activities**

# Conclusions about Individually-Focused Interventions

- **Overall, individually-targeted school based prevention strategies are effective for reducing substance use and antisocial behavior.**
- **The most effective strategies are:**
  - Instructional programs that teach social competency skills using cognitive-behavioral methods; and
  - Other cognitive behavioral or behavioral programs.
- **Strategies that do *not* appear effective are:**
  - Counseling, social work, and other therapeutic interventions that are not based on behavioral or cognitive-behavioral models
  - Individual attention/mentoring/tutoring/ coaching
  - Recreational, enrichment and leisure activities

# Risk Factors for Future Offending, By Domain

Individual Factors	Family Factors	School and School-Related Factors	Peer Factors	Community Factors
<p>Neuropsychological deficits: Executive Functioning</p> <p>Low Intelligence</p> <p>Early “Under-controlled” Temperament: (restless, impulsive, poor attention, uninhibited)</p> <p>Low empathy</p> <p>Impulsiveness</p> <p>Social Cognitive Skill Deficits</p>	<p>Family History of Crime</p> <p>Large Family Size</p> <p>Separation from Biological Parents</p> <p>Family Mgmt. Practices:</p> <ul style="list-style-type: none"> <li>• Poor Supervision/ Monitoring</li> <li>• Inconsistent Discipline</li> <li>• Lack of Warmth</li> </ul> <p>Family Conflict</p> <p>Weak emo'l bonds to fam. [Individ. Factor]</p>	<p>Individual School-Related Factors:</p> <ul style="list-style-type: none"> <li>• Academic Failure</li> <li>• Low Attachment to School</li> <li>• Low Commitment to Educational Goals</li> </ul> <p>School Factors:</p> <p>Inconsistent Disciplinary Practices</p> <p>Communal organization (+)</p>	<p>Peer Rejection in Elementary School</p> <p>Association with Delinquent Peers</p>	<p>Urban Location</p> <p>“Concentrated Disadvantage”:</p> <ul style="list-style-type: none"> <li>• Poverty</li> <li>• High % Female-Headed Households</li> <li>• Residential Instability</li> </ul> <p>Low “collective efficacy” – willingness to intervene</p> <p>Community norms for behavior</p>

# Effective Program Models: Individually- Focused

<b>Universal:</b>
PATHS: Promoting Alternative Thinking Strategies LIFT: Linking the Interests of Families and Teachers GBG: Good Behavior Game
<b>Targeted:</b>
Preventive Treatment Program Behavioral Monitoring and Reinforcement Program

# PATHS: Promoting Alternative Thinking Strategies

- **Comprehensive program for**
  - promoting emotional and social competencies
  - reducing aggression and behavior problems
- **For elementary school-aged children, entire classrooms**
- **Multi-year, universal prevention model**
- **Ideally initiated at the entrance to schooling and continues through Grade 5**
- **Taught three times per week for a minimum of 20-30 minutes per day by regular teacher**

- Emotional literacy
- Self-control
- Social competence
- Positive peer relations, and
- Interpersonal problem-solving skills

- **Readiness and Self-Control Unit**
  - 12 lessons that focus on readiness skills and development of basic self-control
- **Feelings and Relationships Unit**
  - 56 lessons on emotional and interpersonal understanding
- **Self-control and initial problem-solving (integrated with Feelings unit)**
  - “Control Signals” Poster:
    - red light to signal "Stop - Calm Down,“
    - yellow light for "Go Slow - Think,“
    - green light to signal "Go - Try My Plan,“
    - “How Did My Plan Work?“
  - Children were taught skills to use with the different signals of the poster.
- **Interpersonal Cognitive Problem-Solving -- 33 lessons sequentially covering eleven problem-solving steps.**
- **Generalization procedures -- A variety of generalization techniques were included throughout the curriculum to foster transfer of the skills and ideas taught.**

# PATHS: Risk Factors Targeted

Individual Factors	Family Factors	School and School-Related Factors	Peer Factors	Community Factors
<p>Neuropsychological deficits: Executive Functioning</p> <p>Low Intelligence</p> <p><b>Early “Under-controlled” Temperament: (restless, impulsive, poor attention, uninhibited)</b></p> <p><b>Low empathy</b></p> <p><b>Impulsiveness</b></p> <p><b>Social Cognitive Skill Deficits</b></p>	<p>Family History of Crime</p> <p>Large Family Size</p> <p>Separation from Biological Parents</p> <p>Family Mgmt. Practices:</p> <ul style="list-style-type: none"> <li>• Poor Supervision/ Monitoring</li> <li>• Inconsistent Discipline</li> <li>• Lack of Warmth</li> </ul> <p>Family Conflict</p> <p>Weak emo’l bonds to fam. [Individ. Factor]</p>	<p>Individual School-Related Factors:</p> <ul style="list-style-type: none"> <li>• Academic Failure</li> <li>• Low Attachment to School</li> <li>• Low Commitment to Educational Goals</li> </ul> <p>School Factors:</p> <p>Disciplinary Practices Inconsistent</p> <p>Communal organization (+)</p>	<p><b>Peer Rejection in Elementary School</b></p> <p>Association with Delinquent Peers</p>	<p>Urban Location</p> <p>“Concentrated Disadvantage”:</p> <ul style="list-style-type: none"> <li>• Poverty</li> <li>• High % Female-Headed Households</li> <li>• Residential Instability</li> </ul> <p>Low “collective efficacy” – willingness to intervene</p> <p>Community norms for behavior</p>

# PATHS: Relatively Inexpensive

- Program costs over a three-year period range from \$15/student/year to \$45/student/year.
- The higher cost includes hiring an on-site coordinator, the lower cost involves redeploying current staff.

- Intervention teachers rated their classrooms as having fewer conduct problems.
- Socio-metric measures showed lower ratings for peer aggression and hyperactivity in the intervention classrooms.
- Classroom observers rated the atmosphere in the intervention classrooms as more positive and conducive to learning.
- All three data sources converged in suggesting a positive effect of the curriculum on antisocial classroom behavior.

# Preventive Treatment Program (PTP)

- **AKA “Montreal Longitudinal Experimental Study”**
  - A longitudinal panel study of 1,037 kindergarten boys from age 6 through 26
  - An experimental study of a preventive intervention delivered to high-risk boys entering 2<sup>nd</sup> grade (average age=7) for two school years
- **Experimental study designed to prevent antisocial behavior of boys who display early, problem behavior.**
- **Long-term goal: to decrease delinquency, substance use, and gang involvement.**
- **Boys rated by their kindergarten teachers at above the 70<sup>th</sup> percentile on disruptive behavior were randomly assigned to treatment or control.**

- **Parent management training based on Gerald Patterson's model (Oregon Social Learning Center) – 17 sessions**
  - Monitoring behavior
  - Clear rules
  - Rewards and punishments contingent on behavior
  - Managing family crises
- **Child Social Skills Training – based on a cognitive behavioral model – 19 sessions**
  - Delivered in small groups of 1-2 disruptive boys plus 3-5 pro-social peers
  - Coaching
  - Peer modeling
  - Role playing
  - Reinforcement contingencies

- **At age 12, three years after the intervention:**
  - Treated boys were less likely to report the following offenses: trespassing, taking objects worth less than \$10, taking objects worth more than \$10, and stealing bicycles.
  - Treated boys were rated by teachers as fighting less than untreated boys.
  - 29% of the treated boys were rated as well-adjusted in school, compared to 19% of the untreated boys.
  - 22% of the treated boys, compared to 44% of the untreated boys, displayed less serious difficulties in school.
  - 23.3% of the treated boys, compared to 43% of the untreated boys, were held back in school or placed in special education classes.

- **At age 15, those receiving the intervention were less likely than untreated boys to report:**
  - Gang involvement;
  - Having been drunk or taken drugs in the past 12 months;
  - Committing delinquent acts (stealing, vandalism, drug use); and
  - Having *friends* arrested by the police.

# PTP: Conclusions from Meta-Analysis (so far)

- **Individually-targeted approaches show positive results for**
  - Self-control or social competency instruction using cognitive-behavioral or behavioral instructional methods
  - Cognitive behavioral, behavioral modeling, or behavior modification interventions

Schools in which “...members know, care about, and support one another, have common goals and sense of shared purpose, and...actively contribute and feel personally committed”

# CSO → Student Bonding → Delinquency

# Conclusions from Meta-Analysis

- **Environmental change approaches are somewhat more effective than individually-targeted approaches**
- **Environmental change approaches: Positive results for**
  - School and discipline management interventions
  - Interventions to establish norms or expectations for behavior
  - Classroom or instructional management
  - Reorganization of grades or classes
- **More research needed on environmental change approaches: Many of the studies do not meet the contemporary requirements for establishing causal effects**

- **Intervention Category:** school and discipline management interventions
- **Participants:** middle and high school students
- **Program Description:** comprehensive program to alter school organization and management structures; designed to reduce school disorder and improve the school environment to enhance students' experiences and attitudes about school
- **Implementer:** school staff
- **Duration/Intensity:** 2 years (middle) or 1 year (high)
- **Effect of Program:**
  - Improved School Climate
    - Smooth administration
    - Teacher morale
    - Discipline practices (clarity of rules)
  - Increased student school attachment and reduced student alienation
  - Decreased student crime, antisocial behavior, and substance use

# Olweus Bullying Prevention Program

- **Intervention Category:** establishing norms or expectations for behavior
- **Participants:** elementary school students
- **Program Description:** school-wide program designed to alter environmental norms regarding bullying; among the recommended strategies are establishing clear class rules against bullying, regular class meetings to clarify norms, and contingent responses (praise and sanctions)
- **Implementer:** teachers
- **Duration/Intensity:** 20 months
- **Effect of Program:**
  - Decreased crime
  - Decreased anti-social behavior (bullying)

- **Intervention Category:** classroom or instructional management
- **Participants:** elementary school students
- **Program Description:** program includes “cooperative learning” activities, a values-rich literature-based reading and language arts program, a positive approach to classroom management, “community building” activities, and “home-school” activities to foster parent involvement
- **Implementer:** teachers
- **Duration/Intensity:** 2 years
- **Effect of Program:**
  - Decreased crime (.27\*)
  - Decreased substance use (.19\*)

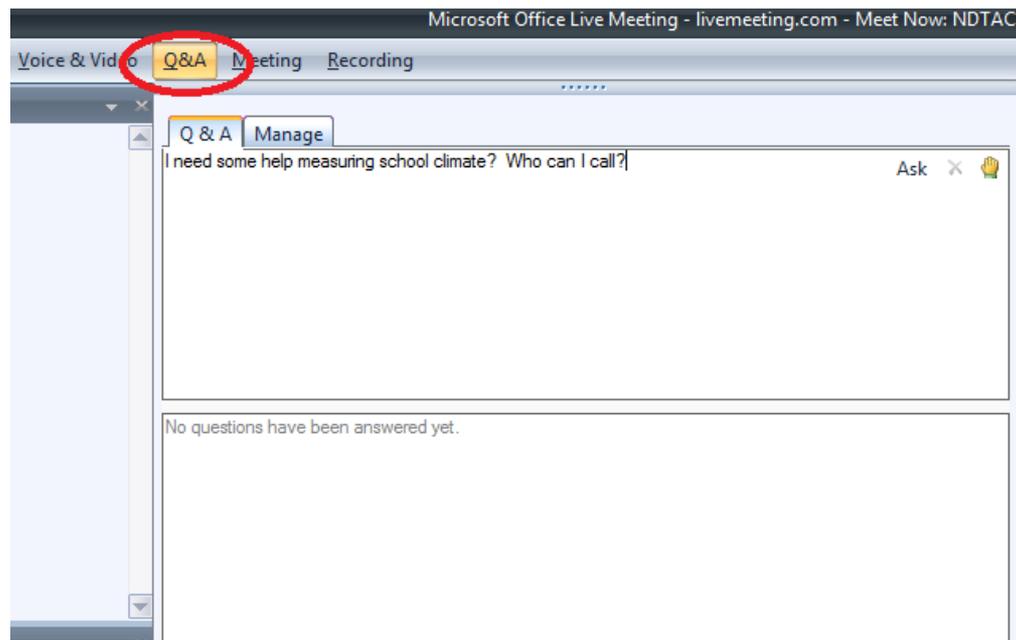

- **Intervention Category:** Reorganization of grades or classes
- **Participants:** high risk students in grades 7 and 9
- **Program Description:** “school-within-a school;” integrated social studies and English class, including a law-related education curriculum and instructional methods emphasizing student participation, cooperative learning
- **Implementers:** school teachers
- **Duration/Intensity:** 1 school year, 2 hours per day
- **Effect of Program:**
  - Increased attachment to school
  - Decreased crime (.36\*)
  - Decreased anti-social behavior (.23)
  - Decreased substance use (.40\*)

# Questions?

If you have a question for the presenter, please type it in the Q & A Pane or email [sssta@air.org](mailto:sssta@air.org).

- What do schools do to prevent conduct problems?
- How well do they do it?

# National Study of Delinquency Prevention in Schools (NSDPS)

- **Collected, examined, and classified examples of prevention now being used in schools**
- **Collected data from a large national probability sample of schools**
  - Principal survey for program identification
  - Activity coordinator survey
  - Teacher and student surveys
  - Principal discipline and school-wide practices survey

# Types of Prevention Activities

1. Prevention curriculum, instruction, or training
2. Cognitive behavioral or behavior modification interventions
3. Counseling/social work/psychological/therapeutic interventions
4. Individual attention/mentoring/tutoring/coaching
5. Recreational, enrichment and leisure activities
6. Referral to other agencies or for other services
7. Improved instructional methods or practices
8. Improved classroom management methods or practices
9. Distinctive culture or climate for interpersonal exchanges - or improvements to intergroup relations or interaction between school and community
10. Communication of norms or expectations for behavior.
11. Use of external personnel resources in classrooms
12. Youth roles in regulating and responding to student conduct
13. School planning structure or process - or management of change
14. Security and surveillance

*The typical school had 14 different unique programs or practices that they could name in place at any one time.*

# What Programs do Schools Use?

- 47% of middle schools use at least one of the 10 “effective” curricula that had been included on one or more government agency list of effective programs (Botvin’s Life Skills Training, etc.)
- But schools use **MANY DIFFERENT** curricula, and only 26% report using evidence-based programs “the most”.
- 28% use “locally-developed” curriculum “the most” .
- 46% use other manualized programs that are not recognized as effective “the most” .

# Adequacy of Implementation

<b>Grade</b>	<b>Percentage of quality dimensions rated "adequate"</b>	<b>Percentage of Activities</b>
<b>A</b>	90-100%	18
<b>B</b>	80-89%	11
<b>C</b>	70-79%	11
<b>D</b>	60-69%	13
<b>F</b>	<60%	47
<b>Total</b>		<b>100</b>

- **Several evaluations have demonstrated that effects are higher in “high fidelity” samples.**
- **One example: Botvin et al., 1990’s study of Life Skills Training implemented by regular teachers:**
  - % material covered ranged from 27 to 97.
  - Program is most effective in “high fidelity” classrooms (e.g., >60% covered).
  - Drug use of students at post-test inversely related to amount of material covered.

# How to Increase Fidelity

- Ensure principal support
- Provide high quality training
- Supervise prevention activities
- Use structured materials and programs when possible
- Integrate programs into normal school operations
- Embed the program in a school planning activity

# Conclusion: What Can Schools Do?

- Assess which programs are in place in your school.
- Partner with prevention scientists to assess which of these programs are supported by rigorous scientific evidence of effectiveness.
- Make better use of available resources on effective programs and practices.
- Focus resources on a smaller number of more effective programs.
- Pay much more attention to the quality of implementation.
- Assist in generating high quality research on environmental-change strategies to reduce problem behaviors.
